Profile

I am a skilled Android developer with six years of experience building and maintaining a wide range of Android applications. Also I have two years of experience with Flutter in a Singapore company.

In my current role as an Android Engineer at True Digital Group, I have been responsible for designing and implementing new features, as well as maintaining and improving existing functionality. I have also worked closely with the rest of the engineering team to troubleshoot and resolve any issues that may arise.

Skills

Programming languages

Java, Kotlin, Dart, Swift

Frameworks and tools

Android, Flutter, iOS, Git, HMS

Other

Strong problem-solving skills, ability to work in a team environment, ability to learn and adapt to new technologies quickly.

Professional Experience

Android Software Engineer, True Digital Group ✉

07/2022 – present

Bangkok, Thailand

- Working as an Android Software Engineer (Technology Manager) in Architecture and Technology Strategy.
- Main focus on TrueID international products and features.
- Collaborated with a team of developers to ensure timely and successful delivery of the application.
- Conducted unit and integration testing to ensure the application was stable and performed as expected.

Mobile Developer (Remote from Bangkok), GTRIIP ✉

09/2021 – 07/2022

Bangkok, Thailand

- Integrate and support existing Flutter projects running in production.
- The first integration of an Android native SDK (library) for a company product was a door lock SDK.
- Worked closely with the product team to gather and incorporate user feedback into the development process.
- Conducted performance testing and optimization to ensure the applications ran smoothly on a variety of hardware configurations.

Mobile Lead, UMFCCI  <ul style="list-style-type: none"> Led a team of mobile developers in the development of a cross-platform mobile application for a communication platform. Integrate the notification service to support both Google and Huawei devices into the notification module. Deploy the app on both iOS and Android platforms using Flutter while leading the mobile team. Managed the development process, including setting project timelines, assigning tasks, and conducting code reviews. 	02/2021 – 09/2021 Yangon, Myanmar (Burma)
Senior Android Developer, Codigo  ComfortDelgro  <ul style="list-style-type: none"> Used Kotlin for Android to implement features such as user authentication, point system integration, and payment processing. Integrate new payment options such as NETS Click and PayLah! for Singapore region. Integrate Huawei Mobile Service as the first HMS Taxi app in Asia to maximize users' experiences while using the app from Huawei devices. I developed a point system e-commerce platform for a taxi app. I collaborate and communicated with people in over 3 countries while developing an application. I was able to increase the user experience rating in the PlayStore from 2.0 to 4.4. Handle multiple versions of the application in parallel to enable backward and forward compatibility, as well as bug fixes between different application versions, to provide customers with smooth application upgrades and transactions. 	06/2019 – 02/2021 Yangon, Myanmar (Burma)
Senior Mobile Developer, AcePlus  <ul style="list-style-type: none"> Supported as mobile teams lead and design software requirements and architecture. I handled multi-platform products for both native Android and iOS within a tight timeline. Performance improved and maintained the legacy Java codebase to Kotlin using MVVM. Given training and guidelines for Modern Android Development (MAD). 	01/2019 – 06/2019 Yangon, Myanmar (Burma)
Mobile Application Developer, Global New Wave Technology  <ul style="list-style-type: none"> I developed an iOS project (a music platform) using the Swift language. I developed five Android projects for company customer projects, both with single and group members. I developed music streaming, shopping, and accounting system apps. 	09/2017 – 01/2019 Yangon, Myanmar (Burma)
Internship, New Westminster Institute <ul style="list-style-type: none"> Developed and maintained a single project. I learned about web technology, mobile technology, and company architecture. 	05/2017 – 09/2017 Yangon, Myanmar (Burma)

Education

Bachelor of Computer Science, University of Computer Studies Yangon  <ul style="list-style-type: none"> Completed all required coursework in computer science, including data structures, algorithms, software engineering, and computer systems. Developed strong programming skills in languages such as Java, PHP, and C++. Completed a capstone project where I developed a web-based application for managing inventory and sales for small businesses. 	2012 – 2017 Yangon, Myanmar (Burma)
